Transcription in the linguistic sense is the systematic representation of language in written form. The source can either be utterances (speech or sign language) or preexisting text in another writing system.. Transcription should not be confused with translation, which means representing the meaning of a source language text in a target language (e.g. Los Angeles into City of Angels) or with ...

LEXICONS and GRAMMARS. The standard lexicon for the Syriac is the Payne Smith Compendious Syriac Dictionary. It is available online for free here, and it is broken down by initial letter, but it is basically a collection of image files which makes it rather cumbersome to find a desired entry. You can, however, buy a "Syriac Lexicons" CD of the book as a PDF scan for only \$18.

Microglia, the brain's primary immune sentinels, quickly regenerate and restore their population after an acute insult. Lihong Zhan, Li Gan and colleagues use lineage tracing to address the debate about the origin of repopulating microglia and describes the spatial and temporal characteristics of microglial regeneration.

A Note on Terminology ... Advocates of free translation have invented several terms to refer to their approach. The term dynamic equivalence was coined by Eugene Nida in an attempt to avoid the negative connotations of the word paraphrase. Later, Nida used the term functional equivalence to avoid the negative connotations which quickly became attached to dynamic equivalence.
