OXO or Noughts and Crosses is a video game developed by A S Douglas in 1952 which simulates a game of noughts and crosses. It was one of the first games developed in the early history of video games. Douglas programmed the game as part of a thesis on human-computer interaction at the University of Cambridge. It was written on the Electronic Delay Storage Automatic Calculator (EDSAC).

Computers have often been used as fictional objects in literature, movies and in other forms of media. Fictional computers tend to be considerably more sophisticated than anything yet devised in the real world. This is a list of computers that have appeared in notable works of fiction. The work may be about the computer, or the computer may be an important element of the story.

## **List of fictional computers - Wikipedia**

A few multi-metal-based systems were created to probe the regulation mechanism in electrocatalytic reactions. This work investigates a set of unique models of electrocatalysts based on the supertetrahedral metal sulfide nanoclusters with tunable multi-metal (Mn, Co, Zn) sites, which show an obvious synergistic effect on enhancing the electrocatalytic activities in hydrogen evolution reaction.

A cover letter, though not a compulsion for application for any job, is an extremely useful tool which can be used by prospective applicants to give the interviewer or the employer a brief idea or a conception of their interest and the expertise level. The format of cover letter should be extremely formal and crisp and should contain a qualitative view of the resume attached.
